

Customer Journey Map

Date	29 June 2026
Team ID	xxxxxx
Project Name	Flood Prediction System
Maximum Marks	2 Marks

Customer Journey Map

Phase of Journey	Stage 1 Data Collection	Stage 2 Flood Prediction	Stage 3 Decision & Response
Actions <i>What does the customer do?</i>	- Collects rainfall and weather data. - Monitors environmental conditions. - Enters required data into the system.	- Runs the flood prediction model. - Reviews the prediction results. - Checks the flood risk level.	- Issues alerts if necessary. - Plans emergency response. - Takes preventive measures.
Touchpoint <i>What part of the service do they interact with?</i>	- Weather reports - Flood Prediction Web Application	- Machine Learning Prediction System - Prediction Dashboard	- Alert System - Disaster Management Team
Customer Thought <i>What is the customer thinking?</i>	- Is the collected data accurate? - Have I entered all required values? - Will the system provide reliable predictions?	- How accurate is the prediction? - Is there a flood risk? - Should preventive action be taken?	- How can we minimize damage? - Are people prepared? - Have all necessary precautions been taken?

Customer Feeling <i>What is the customer feeling?</i>	• Curious • Hopeful • Responsible	• Concerned • Alert • Focused	• Confident • Prepared • Relieved
Process Ownership <i>Who is in the lead on this?</i>	Disaster Management Officer	Machine Learning Prediction System	Disaster Management Authority
Opportunities <i>How can we improve this stage?</i>	• Improve data collection accuracy. • Integrate real-time weather APIs. • Automate data entry.	• Increase prediction accuracy. • Use larger historical datasets. • Improve model performance.	• Provide instant mobile alerts. • Improve emergency coordination. • Enhance disaster response planning.
