

Demonstration of Proposed Features

Date	5 July 2026
Team ID	XXXXXX
Project Name	Flood Prediction System
Maximum Marks	1 Mark

Demonstration of Proposed Features:

This document captures all the features that were proposed during the project planning phase and tracks whether each feature was successfully implemented and demonstrated. It serves as evidence of the team's ability to deliver on the proposed solution.

S.No	Feature Name	Description	Status (Implemented / Partial / Pending)	Demonstrated (Yes / No)	Remarks
1	User-Friendly Web Interface	Provides a simple interface for entering weather parameters and viewing prediction results.	Implemented	Yes	Successfully demonstrated during project execution.
2	Data Preprocessing	Processes and scales input data using StandardScaler before prediction.	Implemented	Yes	Improves prediction consistency and accuracy.
3	Machine Learning Prediction	Uses the trained XGBoost model to predict flood occurrence.	Implemented	Yes	Core functionality demonstrated successfully.
4	Model Evaluation	Evaluates multiple machine learning models and selects the best-performing model.	Implemented	Yes	Decision Tree, Random Forest, KNN, and XGBoost were compared.
5	Result Display	Displays either Flood or No Flood prediction based on user input.	Implemented	Yes	Both outcomes were successfully demonstrated.
6	Flask Integration	Connects the frontend with the trained machine learning model for real-time prediction.	Implemented	Yes	Successfully integrated and tested.

Feature Implementation Summary:

Total Features Proposed	6
Total Features Implemented	6
Total Features Demonstrated	6
Overall Implementation Rate (%)	100%
